

LED Vehicle Light Bar

This high-intensity LED light bar is designed for emergency vehicles. It features a durable aluminum construction and programmable display for effective signaling.

Product Overview

High-Intensity Emergency Signaling

The LTF8400 is a high-intensity LED light bar engineered specifically for police and emergency vehicle applications. Designed for maximum visibility and effective signaling, it ensures safety in diverse weather conditions. This robust unit features programmable display capabilities, allowing for clear text communication such as 'POLICE' to be shown during critical operations.

Technical Specifications

Light Source	LED
Programmable Display	Yes
Primary Application	Police, Emergency Vehicles

Installation

Mounting Method	Roof-mounted
Hardware Included	Yes

Performance

Key Performance Features

- High-intensity illumination
- Durable construction
- Programmable text display
- All-weather visibility
