

Lever Chain Hoist

This lever hoist features alloy steel hooks that deform under overload to prevent fracture. Its safety-lock hooks rotate 360 degrees for versatile operation.

Overview

Professional Lever Chain Hoist

This industrial-grade lever chain hoist is designed for versatile lifting and pulling applications. It features a robust alloy steel construction that ensures safety under load, including an overload protection mechanism that prevents sudden fractures. The closed-body design protects internal components from environmental pollution, while the 360-degree rotating hooks and ergonomic handle allow for effortless, precise operation.

Model Specifications

Model	Rated Load (kg)	Net Weight (kg)	Chain Size
HSH-KA250	250	2.2	4*12
HSH-KA500	500	3.2	4*12
HSH-KA1500	1500	7.6	7*21
HSH-KA3000	3000	14	9*27
HSH-KA6000	6000	22	9*27

Construction

Key Features

- Anti-aging high-strength alloy steel hooks
- 360-degree rotating hooks with safety locks
- Closed-type housing for contamination protection
- Double pawl brake system for redundancy
- Grade 80 load chain per ISO/DIN standards
- Surface-hardened and ground metal bushings
