Product Overview

Industrial Lever Hoist

This VN-type lever hoist is a compact and lightweight lifting solution engineered for construction, shipbuilding, and industrial maintenance. Designed for operation in restricted spaces, it features an ergonomic rubber-sleeved handle and a curved shell for enhanced durability and comfort. With high-strength alloy steel components and a 360-degree rotating safety hook, it provides a reliable and safe tool for heavy-duty lifting and positioning.

Key Features

Core Characteristics

- Lightweight and compact design
- Ergonomic rubber handle sleeve
- Closed housing to prevent internal pollution
- 360-degree rotating safety hook
- Low-noise operation via inverted chain block

Safety & Compliance

Safety Mechanisms

- High-strength alloy steel hooks
- Deformation-before-rupture overload protection
- Integrated safety lock on hooks
- Load-limiting device

Certifications

CE, GS, ISO 9001:2008, ISO 14001:2004, OHSAS 18001:2007
