## Product Overview

### Versatile Lever Operated Wire Rope Hoist

This robust lever-operated wire rope hoist is designed for heavy-duty lifting, pulling, and positioning tasks in construction and agricultural environments. Featuring a durable metallic construction and a user-friendly lever mechanism, it ensures precise control during operation. The system includes built-in overload protection and easily replaceable shear pins, prioritizing safety and low maintenance for demanding industrial applications.

## Technical Specifications

### Available Capacities

- 0.8T x 20M
- 1.6T x 20M
- 3.2T x 20M
- 5.4T x 20M

Standard Wire Rope Length

20 m

Wire Rope Diameter

8.3 mm

## Key Features

### Operational Metrics
