

Light-Duty Commercial Van for Urban Transport

This light-duty commercial van is engineered for urban and regional transport. Its cab-over engine configuration enhances maneuverability, making it ideal for logistics, delivery services, and small business operations.

Overview

Urban Transport Solution

This light-duty commercial van is engineered specifically for efficient urban and regional transport operations. Featuring a cab-over engine configuration and a high-capacity boxy cargo area, it maximizes space utilization while maintaining excellent maneuverability in tight city environments. Designed with a focus on fuel efficiency and ease of maintenance, it is an ideal choice for logistics, delivery services, and small business operations.

Key Features

Design Highlights

- Cab-over engine configuration
- Boxy cargo area for maximum space
- Optimized for urban maneuverability
- Fuel-efficient design
- Easy maintenance architecture
