

Light-Duty Commercial Van for Urban Transport

This light-duty commercial van is designed for urban and regional transport. It features a compact design with a boxy cargo area to maximize space utilization.

Overview

Urban Transport Solution

The Aochi 1800 light-duty commercial van is specifically engineered for efficient urban and regional logistics. It features a spacious, ergonomically designed cab with a front-tilt mechanism for simplified maintenance and a skylight for improved airflow. Built with a robust double-layer riveted frame and a high-torque transmission system, this vehicle is designed to handle heavy loads while maintaining operational stability and reliability.

Performance & Engine

Compatible Engines	FAW490, FAW490Z, FAW4100, FAW4102, YN4100, YN4102, SD4100, SD4102
Steering	Power-assisted, light and flexible

Braking System

Braking Safety Features

- Four circulate air leakage protection
- Energy storage spring brake
- Optional auxiliary exhaust brake

Primary Brake System	Double circulate air brake system
