

Light-Duty Double Cab Commercial Vehicle

This light-duty commercial vehicle is designed for urban and rural transportation. It features a double-cab configuration, providing seating for both the driver and passengers.

Overview

Versatile Light-Duty Transport

This double-cab commercial vehicle is engineered for both urban and rural transportation requirements. Featuring a compact design and a fuel-efficient engine, it offers excellent maneuverability for navigating congested streets while maintaining a sturdy chassis for reliable performance. It is an ideal solution for small businesses and delivery services needing a balance of passenger capacity and cargo utility.

Vehicle Configuration

Cab Configuration	Double Cab
Primary Applications	Urban Transport, Rural Logistics, Small Business Delivery

Performance & Build

Emissions Profile

Low Emissions
