

Light Duty Drilling Machine

The light-duty drilling machine is designed for precision drilling operations. It features a robust construction with a cast iron base and column for stability and reduced vibration.

Overview

Precision Drilling Performance

The ZQ4113 is a light-duty drilling machine engineered for high-precision operations in various settings. Built with a robust cast iron base and column, it ensures superior stability and minimal vibration during use. Featuring a variable speed motor and an adjustable worktable, this unit offers the flexibility required for diverse materials and workpiece positioning, making it an ideal choice for workshops and light industrial applications.

Technical Specifications

Drilling Capacity	13 mm
Motor Power	375 W
Spindle Speed Range	500-2500 RPM

Key Features

Key Features

- Robust cast iron base
- Stable column design
- Variable speed motor
- Adjustable worktable

Application Suitability	Light Industrial, Workshop, DIY
