

Light Duty Rolling Door Machine

This light-duty rolling door machine ensures efficient and reliable operation. Its robust motor and chain drive system provide long-lasting performance.

Product Overview

Professional Rolling Door Automation

The JLZX300SF is a high-performance, light-duty rolling door machine engineered for consistent and reliable industrial operation. Featuring a robust motor and a precision chain drive system, this unit is built to withstand the demands of daily commercial use. Its durable construction ensures a long service life, providing an efficient solution for various rolling door applications.

Key Features

Standard Features

- Robust industrial-grade motor
- Durable chain drive mechanism
- Light-duty design for optimized efficiency
- Designed for varied commercial and industrial applications

Certifications & Compliance

Suitable Applications

Industrial, Commercial, Rolling Door Systems
