

# Light Duty Stainless Steel Ball Valve

This light duty ball valve is constructed from stainless steel 316 and features a blue handle for manual operation. It utilizes a unique valve stem flexible sealing and V-shape packing structure to ensure a reliable seal.

## Product Overview

### Light Duty Stainless Steel Ball Valve

This light duty ball valve is engineered for reliable flow control in general industrial applications. Constructed from high-quality stainless steel 316, it offers excellent corrosion resistance and durability. The unit features a manual blue handle for intuitive operation and is designed for standard piping systems.

## Technical Specifications

Material Grade	Stainless Steel 316
Operation	Manual
Handle Color	Blue
Application Suitability	General Industrial, Flow Control
