

Light-Duty Vehicle Brake Linings

These brake linings are designed for light-duty vehicles. They provide reliable stopping power, ensuring durability and safety.

Product Overview

High-Performance Brake Linings

These light-duty vehicle brake linings are engineered to deliver reliable and consistent stopping power across various driving conditions. Designed to meet or exceed OEM specifications, they provide excellent wear resistance and effectively minimize brake fade for enhanced safety. These components are an ideal solution for professional maintenance and repair of light-duty vehicle braking systems.

Technical Specifications

Available Sizes

Length (mm)	Width (mm)	Thickness (mm)
200	75	7
200	57	7
200	55	6

Model Identifier

MC-160

Performance Features

Performance Highlights

- OEM specification compliance
- High wear resistance
- Reduced brake fade
- Consistent stopping power

Vehicle Compatibility

Light-Duty Vehicles
