

Lighting Busway Power Distribution System

This lighting busway system simplifies engineering and reduces costs with quick installation via plug-in connectors. Optimized end connections and balanced cable distribution ensure each phase connects with an equal number of plug-in units.

Product Overview

Professional Lighting Power Distribution

The Pro-Lighting busway system provides a high-performance solution specifically engineered for modern lighting distribution. Designed for both durability and flexibility, this system features a robust metallic enclosure that ensures reliable protection for internal conductors. It offers an adaptable platform that supports seamless integration of lighting fixtures and control devices across diverse environments.

Key Features

Metallic Enclosure, Easy Installation, High Performance, Control Interface Ready

Application Areas

Recommended Applications

- Workshops
- Commercial Buildings
- Textile Facilities
- Garment Manufacturing
- Supermarkets
- Metro Stations
- Warehouses
- Logistics Centers
- Sport Complexes
- Exhibition Centers
- Congress Halls
