Lightweight Earth Auger Drill

This drilling machine is lightweight and offers strong power for efficient operation. It is suitable for afforestation, tree planting, fence installation, and fertilizing across various terrains.

Overview

Versatile Lightweight Earth Auger

The GL5200D is a powerful and versatile drilling tool designed for efficient performance across various soil applications. Featuring a robust 49.4cc engine and a cylindrical worm drive transmission, it offers professional-grade durability and precise control. Its ergonomic handle design and lightweight construction make it an ideal choice for both professional landscaping and demanding DIY projects.

Performance Metrics

Performance Highlights

2.3 kW	49.4 cc	200 rpm
Max Output	Displacement	Max Drill Speed

Engine & Power

Start-up Mode
Hand starter

Displacement	49.4 cc
Max Output (Horsepower)	3.1 Hp
Cooling System	Forced air-cooled
Ignition Mode	Flywheel magneto ignition

Transmission & Operation

Transmission Mode	Cylindrical Worm Drive
Transmission Ratio	35:1
Drilling Speed	170-200 rpm
Rotational Direction	Clockwise

Physical Characteristics

Dry Weight (No Stem)	10.3 kg
Dimensions (LxWxH)	590 × 345 × 365 mm

Drilling Capabilities	
Available Drill Stem Diameters	¦60mm, ¦100mm, ¦150mm, ¦200mm

Fuel Requirements	
Fuel Mixing Rate	25:1
