

Lightweight Hollow Core Wallboard

This lightweight wallboard is designed with a hollow core for enhanced insulation. It is suitable for both interior and exterior use, providing soundproofing and fire resistance.

Product Overview

Lightweight Hollow Core Wallboard

This lightweight hollow core wallboard is engineered for versatility and performance in diverse construction applications. Its hollow core design significantly reduces overall weight while simultaneously enhancing thermal insulation properties. Ideal for both interior and exterior use, this board offers robust soundproofing and fire resistance, making it a reliable solution for modern building projects.

Key Features

Benefits

Lightweight, Hollow Core, Soundproof, Fire Resistant, Thermal Insulation

Application

Usage Environment

- Interior walls
- Exterior cladding applications
- General engineering projects
