

Lightweight Marine Fire Hose

Synthetic fire hose with a thin internal lining provides a light-weight hose with a small coil diameter. Its limited space requirement makes this hose ideal for fire brigades and recommended for use in wall hydrant cabinets.

Product Overview

High-Performance Marine Fire Hose

This lightweight marine fire hose is engineered for reliability in demanding maritime environments. Featuring a circular woven polyester jacket with double twisted warp, it offers exceptional resistance to wear, tear, and abrasion. The interior is protected by a thin-walled synthetic rubber lining, applied via a specialized vulcanizing technique to ensure superior flexibility, elasticity, and a long service life.

Construction Details

Jacket Material	Circular woven firm polyester fibre with double twisted warp
Internal Lining	Thin walled synthetic rubber
Manufacturing Process	Special vulcanising technique

Performance Features

Key Benefits	Wear Resistant, Abrasion Resistant, Flexible, Elastic, Long Life
