

Line Interactive Uninterruptible Power Supply (UPS)

This line interactive UPS provides reliable power protection for sensitive electronic equipment. It features automatic voltage regulation (AVR), surge protection and battery backup.

Overview

Mini-guard Series Line Interactive UPS

The Mini-guard series line interactive UPS provides reliable power protection for sensitive electronic equipment. It features automatic voltage regulation (AVR) to stabilize AC voltage, surge protection to prevent damage from power spikes, and battery backup to maintain power during outages. The unit is designed for versatility, suitable for both desktop or floor placement, and includes user-friendly LED indicators for monitoring status.

Key Features

Monitoring & Alerts

- LED status indicators
- Audible alarm system
- Optional remote monitoring ports

Core Technologies

Automatic Voltage Regulation (AVR), Surge Protection, Battery Backup, Advanced Battery Management

Design & Utility

Design Attributes

Compact Design • Desktop/Floor Mountable • Multiple Output Receptacles
