

Line-Interactive Uninterruptible Power Supply with LCD

This line-interactive UPS provides power backup and surge protection for sensitive equipment. It features a large LCD that displays real-time monitoring of voltage, battery level, and load status.

Overview

Reliable Power Protection

This line-interactive uninterruptible power supply (UPS) provides essential backup power and surge protection for sensitive electronic equipment like PCs and home appliances. It features a large, informative LCD display for real-time monitoring of critical power metrics. Designed for seamless integration, it automatically synchronizes with mains frequency and supports smart communication via USB or RS232.

Electrical Specifications

Output Voltage Options

- 110V
- 120V
- 220V
- 230V

Input Voltage Range	80V-140V, 165V-275V, 140V-275V
---------------------	--------------------------------

Frequency Synchronization	Yes
---------------------------	-----

Features & Connectivity

Display Interface

Large LCD • Real-time Monitoring

Communication Ports	USB, RS232
---------------------	------------

Alarm System	Smart Audible Alarm
--------------	---------------------

Operational Details

Recommended Use

- Personal Computers
- Home Appliances

Battery Charging	Automatic charging enabled even when UPS is powered off
------------------	---
