Overview

Reliable Power Protection

This line-interactive uninterruptible power supply (UPS) is engineered to safeguard sensitive electronic equipment against power outages, voltage fluctuations, and surges. With a capacity range of 600VA to 1000VA, it provides essential backup power and stability for home and office environments. The unit features intelligent battery management and automatic voltage regulation to ensure continuous, reliable operation.

Technical Specifications

Display Interface

LED Display • LCD Display

Capacity Range

600VA - 1000VA

Voltage Stabilization

Boost AVR, Buck AVR

Control System

Microprocessor-based digital control

Protection & Safety

Protection Features

- Short circuit protection
- Battery overcharge protection
- Battery overdischarge protection
- Overload protection
- Surge protection

Battery Management

Battery Management

- Temperature compensation to extend life
- Three-stage charging
- Automatic charging in OFF mode

Connectivity & Operation

Operational Modes

- Cold start
- Auto restart on mains restoration
- Unattended safety shutdown
- Auto sensing frequency

Connectivity

USB Port, RJ45 Port
