

Linear Fluorescent Light Fixture

This linear fluorescent light fixture is designed for surface mounting. It provides a broad, even distribution of light and features a prismatic diffuser to minimize glare.

Product Overview

Professional Linear Lighting Solution

This linear fluorescent light fixture is designed for efficient, broad-spectrum illumination in commercial and utility environments. Featuring a high-quality prismatic diffuser, it effectively minimizes glare while maximizing light output across workspaces. Its surface-mount design ensures versatile installation in offices, workshops, and utility areas, providing reliable and even lighting distribution for professional settings.

Physical Characteristics

Mounting Type	Surface Mount
Diffuser Type	Prismatic

Application

Recommended Applications	Commercial Offices, Workshops, Utility Areas, General Illumination
--------------------------	--

Performance Features

Key Benefits

- Broad, even light distribution
- Glare reduction via prismatic diffuser
- Versatile surface mounting
- Suitable for diverse commercial environments
