

Linear LED Shelf Lighting

This linear LED lighting is designed for shelf illumination. It provides focused lighting for retail and display applications.

Product Overview

Professional Linear Shelf Illumination

This linear LED shelf lighting solution is designed to provide clean, uniform illumination for retail displays and shelving units. Featuring a versatile, low-profile design, it is ideal for highlighting products on shelves or under-cabinet applications. The system utilizes efficient LED technology to ensure consistent light distribution across various surface lengths.

Technical Specifications
