

Lineman's Pliers

These lineman's pliers are designed for gripping, cutting, and bending wires and cables. They feature induction-hardened cutting edges and comfortable grips.

Overview

Professional Grade Lineman's Pliers

These lineman's pliers are precision-engineered for professional electrical and construction applications. Designed for gripping, cutting, and bending wires and cables, they feature a high-leverage mechanism to ensure efficient operation with minimal effort. Constructed from durable, high-strength steel, these tools are built to withstand demanding job site conditions while providing long-term reliability.

Key Features

Core Functionality

- Wire and cable gripping
- Precision wire cutting
- Wire bending and forming

Design Advantages

High-leverage design, Induction-hardened edges, Ergonomic grip, Reduced hand fatigue

Technical Specifications

Recommended Applications

Electrical Work • Construction • General Maintenance

Material

Durable Steel
