

Liquid Dispensing Blender with Integrated Filter

This kitchen appliance features a transparent container with an integrated filter. It is equipped with a spout and lever mechanism for dispensing liquids after blending, mixing, or juicing.

Product Overview

Professional Liquid Dispensing Blender

This advanced liquid dispensing blender is engineered for efficient blending and mixing applications in commercial environments. Featuring an integrated filter system, it ensures smooth, pulp-free results for juices and other liquid mixtures. The unit is designed with a convenient dispensing lever, allowing for precise, mess-free pouring directly from the container.
