

Lithium-Ion Replacement Battery 7.2V 4200mAh

This high-capacity lithium-ion battery is designed as a replacement for Sony NP-F750 and NP-F770 series batteries. It operates at 7.2V with a capacity of 4200mAh, providing extended power for compatible devices.

Product Overview

High-Capacity Power Solution

This high-capacity lithium-ion battery serves as a reliable replacement for NP-F750 and NP-F770 series power units. Engineered for extended performance, it provides 4200mAh capacity at 7.2V to keep your devices running longer. Designed for professional use, this battery ensures consistent power delivery for compatible equipment.

Technical Specifications

Voltage	7.2 V
Capacity	4200 mAh
Chemistry	Lithium-Ion

Compatibility

Compatible Series	NP-F750, NP-F770
-------------------	------------------

Safety & Usage

Safety Precautions

- Do not dispose of in fire
- Avoid exposure to excessive heat
- Do not short-circuit external contacts

Charging Requirements	Use specified charger only for safe and efficient charging.
