

Lithium Iron Phosphate Battery 48V 100Ah

This lithium iron phosphate (LiFePO4) battery is designed for energy storage applications. It features a modular design for scalability, allowing users to connect multiple batteries in parallel to increase capacity.

Overview

High-Performance Energy Storage

This 48V 100Ah Lithium Iron Phosphate (LiFePO4) battery is engineered for reliable energy storage in demanding environments. It features an advanced integrated Battery Management System (BMS) that provides real-time monitoring and protection against voltage, current, and temperature fluctuations. With a modular design that supports parallel expansion, this solution is ideal for industrial UPS, telecommunications backup, and renewable energy applications.

Technical Specifications

Cycle Life

5000 cycles

Cycles to 80% DOD

3500 cycles

Cycles to 100% DOD

Rated Voltage	48 V
Rated Capacity	100 Ah
Operating Temperature Range	-20 to 60°C
Self-Discharge Rate	d2%per month

Features & BMS

BMS Protection & Control

- Voltage protection
- Current protection
- Temperature monitoring
- Alarm functions
- Remote control capability
- Secondary cut-off protection

Communication Protocols

Modbus, RS485, CAN

Installation & Design

Mounting Options

19-inch Cabinet • Wall-mounted

Cooling System

Passive cooling (low noise)

Applications

Primary Applications

Wireless Hut Back-up, Industrial UPS, Street Lighting, Fiber-Optic Access, Surveillance Systems
