

Lithium Polymer Battery 3.7V 2000mAh with PCB

This lithium polymer battery has a nominal voltage of 3.7V and a capacity of 2000mAh. It incorporates a PCB for enhanced safety and performance in various applications.

Overview

High-Performance Lithium Polymer Battery

This rechargeable lithium polymer battery is engineered for reliable power in portable electronic devices. Featuring a nominal voltage of 3.7V and a 2000mAh capacity, it includes an integrated PCB to provide essential protection against overcharging, over-discharging, and short circuits. This compact power solution is ideal for sensitive applications such as rechargeable breast pumps and other portable electronics.

Technical Specifications

Wiring Configuration

Wire Color	Polarity
Red	Positive (+)
Black	Negative (-)

Nominal Voltage	3.7 V
Capacity	2000 mAh
Model Number	LIP803273

Safety & Compliance

Handling Precautions

- Do not open or disassemble
- Do not crush or puncture
- Do not short external contacts
- Do not dispose of in fire or water

Safety Protections	Overcharge Protection, Over-discharge Protection, Short Circuit Protection, Integrated PCB
