

Lithium Polymer Battery 650mAh

This is a lithium polymer battery with a 650 mAh capacity. The battery has a rectangular shape and a metallic casing.

Overview

Compact Power Solution

This high-performance lithium polymer battery is designed for compact electronic devices requiring reliable and stable power. With a capacity of 650mAh, it offers an optimal balance between energy density and physical size. Its rectangular form factor and metallic casing make it suitable for integration into various portable hardware applications.

Technical Specifications

Capacity

650 mAh
Capacity

Chemistry

Lithium Polymer

Model Identifier

LI363450A

Form Factor

Rectangular
