Product Overview

High-Performance Loader Rubber Track

This high-performance rubber track is engineered for demanding applications in both construction and agricultural machinery. Designed with an optimized tread pattern, it delivers superior traction, stability, and high tractive force across various terrains. Constructed for durability, the track minimizes ground damage and vibration while ensuring efficient operation and a long service life.

Dimensions & Specifications

Track Width	450 mm
Track Pitch	86 mm
Number of Links	58

Performance Features

Operational Benefits

- Less damage to ground surface
- Low noise operation
- High running speed
- Reduced vibration
- Low ground contact pressure
- High tractive force
- Lightweight design
- Easy to replace

Warranty	One year under normal use
----------	---------------------------

Application

Primary Application	Rotovator
Suitable Industries	Construction, Agriculture, Engineering Machinery
