

Lockstitch Sewing Machine with Edge Trimmer and Unison Feed Lockstitch Sewing Machine

The AG5200N is a high-speed lockstitch sewing machine with a vertical edge trimmer, designed for efficient and precise edge-cutting and sewing. The AG0628 is a single-needle unison feed lockstitch sewing machine featuring a sliding bar thread take-up and a high-precision spiral bevel gear drive.

Product Overview

Professional Industrial Sewing Solutions

This series offers two distinct industrial sewing solutions designed for high-efficiency production environments. The high-speed lockstitch machine features a vertical edge trimmer for precision cutting and stitching in a single pass, ideal for collars and garment fronts. The unison feed lockstitch machine utilizes a compound feed mechanism to prevent material slippage, ensuring uniform stitches on medium-heavy materials like leather, canvas, and synthetic textiles.

Technical Specifications

Model Performance Metrics

Model	Max Speed (s.p.m)	Needle Type	Stitch Length (mm)	Weight (kg)
AG5200N	4500	DBx1	5	31/29
AG0628	2000	DPx17	0-8 / 8-15	32/30

Recommended Materials

- Synthetic Leather
- Natural Leather
- Canvas
- Medium-Heavy Weight Fabrics
- Garment Collars
- Front Panels

Core Features

Automatic Lubrication, Unison Feed, Vertical Edge Trimmer, Spiral Bevel Gear Drive, Low Vibration
