Product Overview

Professional Log Handling Solution

This heavy-duty timber jack is engineered to streamline log handling in forestry and firewood processing operations. It features an innovative toe lift design for rapid hook repositioning and an extendable handle that maximizes leverage, significantly reducing manual effort and back strain. Designed for durability and versatility, this tool provides a secure grip on logs ranging from 5 to 20 inches in diameter, ensuring efficient performance across various terrain conditions.

Technical Specifications

Log Diameter Capacity

5 inches

Minimum Diameter

20 inches

Maximum Diameter

Design Features

Heavy-duty Steel, Extendable Handle, Toe Lift Mechanism, Pivoting Foot

Operational Details

Operational Advantages

- Quick-release hook for rapid re-positioning
- Increased leverage through extendable handle
- Stable operation on uneven ground via pivoting foot
- Capability to combine units for enhanced handling

Target Applications

Forestry • Logging • Firewood Processing • Sawmill Operations
