

# Log Saw for Wood Cutting

The LS400M and LS450M are robust log saws designed for efficient wood cutting. These saws feature a sturdy frame for stability and durability during operation.

## Overview

### Robust Log Saw Performance

The LS400M and LS450M log saws are engineered for efficient and reliable wood cutting operations. Featuring a sturdy frame for enhanced stability and a secure material clamping system, these saws ensure precise and consistent cuts. Designed with operator safety in mind, the circular blade is partially enclosed by a protective guard, making these units suitable for both professional and home workshop environments.

## Technical Specifications

### Build Quality

Sturdy Frame • Durable Construction

### Power Source

Electric Motor

### Safety Features

Protective Blade Guard, Material Clamping System

## Usage

### Suitable For

- Professional Woodworking
- Home Use
