

Long Blade Pruning Shear

This pruning shear features long, straight blades for reaching stems inside bundles without damaging other branches. Sharp blades ensure quick and precise cuts for stems and light branches.

ADDITIONAL IMAGES

Overview

The long reach design allows for precision cutting in dense foliage without damaging stems.

Professional Long Reach Pruning Shears

These professional-grade pruning shears are engineered with SK5 stainless steel blades and ultra-fine polishing technology for long-lasting sharpness and abrasion resistance. The long, straight-head design allows for precise cutting within dense bundles of stems without damaging surrounding foliage, making them ideal for harvesting and delicate trimming. Featuring ergonomic non-slip handles and a power-saving rebound spring, these shears reduce user fatigue by up to 20% during extended gardening or agricultural tasks.

Technical Specifications

Key Performance Metrics

205 mm

Total Length

62 mm

Blade Length

3 mm

Blade Thickness

Blade Hardness

HRC 53-58

Material & Build

Blade Material	SK5 Stainless Steel with Integral Heat Treatment
Handle Construction	Injection-molded PP with soft non-slip covers
Blade Design Features	Polished Finish, Jagged Anti-Slip Edge, Straight Long Reach, Corrosion Resistant

Ergonomics & Safety

Safety & Ease of Use

- Safety open/close locking clip
- Rebound spring mechanism for 20% power saving
- Ergonomic non-slip grip
- Integrated storage hook

Applications

Versatile tool suitable for harvesting a wide variety of fruits and medicinal herbs.

Recommended Applications

Orange • Pomegranate • Apple • Cherry • Grape • Medicinal Herbs • Rose Bushes • Shrubs

Comparison

Superior build quality featuring integral heat treatment and secure injection-molded handles.

Build Quality Advantages

Feature	Standard Specification	Alternative Products
Blade Material	Stainless Steel (Integral Heat Treatment)	Carbon Steel (High Frequency Treatment)
Handle Type	Injection Molded (No Fall Off)	Insert Handle (Easy Fall Off)
