

Long-Handled Grass Sickle

This is a long-handled grass sickle with a curved blade. It is designed for cutting grass and vegetation with leverage and ease.

Product Overview

Professional Long-Handled Grass Sickle

This long-handled grass sickle is engineered for efficient vegetation management and harvesting tasks. Featuring a durable metal blade attached to an extended handle, it provides the necessary leverage for comfortable, ergonomic use. It is an ideal tool for trimming grass and clearing vegetation in agricultural or landscaping settings.

Design & Construction
