

Long-Range Outdoor Wireless Bridge

High-performance outdoor wireless bridge designed for long-range data transmission. It features a rugged, weatherproof enclosure for reliable operation in harsh environments.

Overview

High-Performance Connectivity

This high-performance outdoor wireless bridge is engineered for reliable, long-range data transmission in demanding environments. Featuring a rugged, weatherproof enclosure, it ensures stable operation regardless of weather conditions. It supports advanced wireless protocols and robust security features, making it an ideal solution for connecting remote locations and surveillance systems.

Technical Features

Design & Build

Weatherproof Enclosure • Rugged Design • Long-Range Capable

Ideal Applications

Remote Location Connectivity, Surveillance Systems, Outdoor Networking

Security & Connectivity

Yes
