

Long Reach Lopping Shears

These lopping shears are designed with extended reach handles for pruning high branches and dense bushes. They feature a high carbon steel blade and a compound lever system.

Product Overview

High-Performance Long Reach Lopping Shears

These professional-grade anvil lopping shears are engineered for maximum efficiency when pruning high branches and dense foliage. Featuring a compound gear action mechanism, they provide significantly increased cutting power with minimal physical effort. The lightweight aluminum construction ensures user comfort during extended use, while the telescopic handle design offers adjustable reach for versatile gardening tasks.

Cutting Performance

Max Cutting Capacity

35 mm

Cutting Capacity

Blade Coating

Non-stick coated

Blade Material

SK5 High Carbon Steel
