Product Overview

Precision Landscaping Performance

This heavy-duty long reach pruning shear is engineered for professional gardening and landscaping environments. Its design utilizes extended wooden handles to provide superior leverage, significantly reducing operator fatigue during high-volume trimming tasks. The combination of sharp, durable steel blades and a smooth spring-loaded mechanism ensures clean, precise cuts that promote optimal plant health for shrubs, hedges, and small trees.

Technical Specifications

Blade Material	Hardened Steel
Handle Material	Hardwood
Mechanism Type	Spring-loaded, Extended Leverage

Applications

Suitable Applications

- Hedge trimming
- Shrub maintenance
- Small tree pruning
- Landscaping and gardening
