

Long Span Roofing Sheet Roll Forming Machine

This roll forming machine efficiently produces long span roofing sheets. It features a robust construction for durability and precise forming.

ADDITIONAL IMAGES

Overview

High-Performance Long Span Roofing Production

This industrial roll forming machine is engineered for the efficient, large-scale production of long-span roofing sheets from galvanized steel or iron. Featuring a robust 10-step forming process and a powerful 7.5 kW motor, it ensures consistent profile quality and precision for industrial applications. With a production speed of 10-15 meters per minute, this system is designed for high throughput and reliability in demanding manufacturing environments.

Certifications

CE, ISO 9001, SGS

Technical Specifications

Material Capabilities

1.5 mm

Max Thickness

550 mpa

Max Yield Strength

Machine Dimensions

12m x 2.2m x 2.8m

Total Weight

15 T

Forming Stations

10

Power Supply

380V 50Hz 3P

Working Speed

15 m/min

Components

Production Line Components

- Decoiler (8T capacity)
- Leveling and sizing device
- Punching and cutting device
- Control panel
- Car drive device
- Main forming machine
- Bending parts
- Servo motor

Service & Warranty

Warranty	2 years
Delivery Time	45 days after deposit
