

Long Steel Tape Measure with Hand Crank

This long steel tape measure is designed for extended distance measurements. It features a hand crank for retracting the tape and a pointed tip for secure placement.

Product Overview

Professional Long Steel Tape Measure

This robust measuring apparatus is engineered for professionals in surveying, construction, and infrastructure development. Featuring a durable steel tape housed in a high-visibility turquoise frame, it is designed to withstand demanding field conditions. The integrated hand crank allows for quick and smooth retraction, while the ergonomic handle and lanyard ensure ease of transport and use during extended measurement tasks.
