

Loudspeaker Driver with Square Mounting Flange

This loudspeaker driver features a circular diaphragm with a central dust cap. It is designed for audio reproduction in electronic devices, with a square mounting flange.

Overview

High-Performance Loudspeaker Driver

This loudspeaker driver is engineered for precise audio reproduction in electronic devices. Featuring a robust square mounting flange with four dedicated mounting points, it ensures secure installation and stable performance. Its design includes a circular diaphragm and central dust cap, making it an ideal component for full-range or midrange audio applications.

Physical Construction

Mounting Type	Square Flange
Mounting Holes	4
Diaphragm Material	Paper-based
Key Components	Circular Diaphragm, Central Dust Cap, Square Mounting Flange

Application

Audio Role

Full-range • Midrange
