

Loudspeaker with Large-Diameter Cone

This high-performance loudspeaker has a robust construction and optimized design for superior sound reproduction. It is suitable for professional sound reinforcement, home audio systems, and musical instrument amplification.

Product Overview

Professional Audio Performance

This high-performance loudspeaker is engineered with a large-diameter cone and a high-efficiency voice coil to deliver superior sound reproduction. Designed for reliability and durability, the unit features a robust frame construction suitable for demanding environments. It serves as an ideal solution for professional sound reinforcement, high-fidelity home audio systems, and precise musical instrument amplification.

Key Features

Core Features

- Large-diameter cone for enhanced audio output
- High-efficiency voice coil design
- Robust and durable structural frame
- Optimized for professional sound reproduction

Application Suitability

Recommended Applications

Sound Reinforcement, Home Audio, Musical Instrument Amplification
