

# Low Pressure DC 3V Solenoid Valve for Appliances

This is a low water pressure valve suitable for household electrical appliances. It features a solenoid valve with a DC 3V LPG rating.

## Product Overview

### High-Efficiency Low Pressure Control

This solenoid valve is specifically engineered for household electrical appliances requiring reliable water flow regulation under low pressure conditions. Featuring a robust double-solenoid design, it ensures consistent performance and durability. Its compact construction and precise engineering make it an ideal component for integrating into various appliance water management systems.

## Technical Specifications

Voltage Rating	DC 3V
Solenoid Configuration	Double Solenoid
Weight	0.7 kg
Primary Application	Household Appliances, Low Pressure Systems
Model Identifier	ZD131-C
