

# Low Pressure Fine Finishing Spray Gun

This low-pressure spray gun is designed for fine finishing and coating applications. Its precision-engineered nozzle and air cap ensure optimal atomization and spray pattern control.

## Product Overview

### Professional Fine Finishing Performance

The RL-200 is a precision-engineered low-pressure spray gun designed specifically for fine finishing and high-quality coating applications. Its advanced nozzle and air cap system ensure optimal atomization and superior control over spray patterns, making it an ideal choice for demanding tasks. Built with high-quality materials, this tool offers the durability required for consistent performance in automotive refinishing, woodworking, and general industrial environments.

## Technical Specifications

### Key Features

- Low pressure atomization technology
- Precision-engineered nozzle
- Ergonomic handle design
- High-durability construction

<b>Model Number</b>	RL-200
<b>Suitable Applications</b>	Automotive Refinishing, Woodworking, Industrial Coating
