

Low Pressure Spray Gun for Fine Finishing

This high-performance, low-pressure spray gun is designed for fine finishing and coating applications. It is constructed with durable materials and provides consistent results for industrial and automotive uses.

Product Overview

High-Performance Finishing Solution

This low-pressure spray gun is engineered for precision fine finishing and coating applications. It features a specialized nozzle and air cap system designed to deliver optimal atomization and superior spray pattern control. Built for durability and reliability, it is an efficient tool suitable for a diverse range of paints, coatings, and industrial fluids, ensuring consistent results across automotive and general industrial tasks.

Technical Specifications

Primary Applications

- Fine finishing
- Automotive coating
- Industrial fluid application

Model ID	RARL-200
Secondary Reference	RL100.G
Adjustment Controls	Fan Control, Cap Adjustment, Fluid Control
