

Low Profile Nylon Cable Ties

These cable ties are designed for securing cables and wires in various applications. The ties feature a streamlined, low-profile head that minimizes obstruction and reduces snagging.

Product Overview

Professional Cable Management Solution

These low-profile nylon cable ties are engineered for secure and efficient cable management in demanding environments. Constructed from high-quality Nylon 6.6, they offer excellent insulation properties, chemical resistance, and durability against aging. The specialized in-line head design minimizes obstruction and snagging, making them ideal for organized, professional installations in both indoor and outdoor settings.

Technical Specifications

Flammability Rating

UL 94V-2

Application Temperature Range

-40 °C

Min Temp

85 °C

Max Temp

Installation Temperature Range

-20 °C

Min Temp

85 °C

Max Temp

Material

Nylon 6.6

Physical Characteristics

Key Properties

- Acid & erosion resistant
- High insulation properties
- Aging resistant
- High tensile strength
- Low-profile in-line head

Available Colors

Natural, Black, UV Black, Custom Colors
