

Low-Rise Vehicle Lift for Auto Shops

This low-rise lift is designed for auto maintenance and repair shops. It provides easy access to vehicle undercarriages for quick tire changes, brake work, and general maintenance.

Product Overview

Compact Lifting Solution

This ultra-thin low-rise vehicle lift is designed specifically for auto shops requiring efficient access to vehicles with low chassis. Its separable platform and pump design offer versatile installation options, allowing it to be used effectively at different sites. The system is engineered to streamline tire service tasks, making tire changing operations significantly faster and easier.

Technical Specifications

Max. Lifting Weight

2.5 T

Max Weight

Supply Voltage	380V/220V
Power Rating	750 W
Main Frame Lifting Height	580 mm
Total Weight	375 KG
Dimensions (L x W x H)	2,100mm x 1,800mm x 80mm
Recommended Hydraulic Oil	46# wear-resistant hydraulic oil

Features

Key Features

- Ultra-thin profile for low-chassis vehicles
- Separable platform and pump unit
- Optimized for quick tire repair and service
- Versatile site deployment
