

Low Temperature Cable Ties

These cable ties are designed for reliable use in low-temperature environments. They provide a secure fastening solution when standard cable ties may become brittle.

Product Overview

High-Performance Low Temperature Cable Ties

These specialized cable ties are engineered for reliable performance in extreme cold environments where standard materials may fail. Manufactured using premium-grade PA66 materials, they offer exceptional durability and resistance to brittleness. Designed for industrial and outdoor applications, these ties provide a secure and long-lasting fastening solution for professional use.

Manufacturing Excellence

Our large-scale production facility utilizes 110 injection molding machines to ensure consistent quality and supply.

Manufacturing Experience	25 years
Injection Molding Machines	110
Total Employees	400+

Material Specifications

Material Composition	PA66, High-Grade Polymer
