

# Low Voltage DC48V LED Track Lighting Spotlights

These LED spotlights feature a safe, low-voltage DC48V track lighting system for versatile and efficient illumination. The track system allows adjustable positioning and easy installation.

## Product Overview

### Versatile Low-Voltage Track Lighting

This DC48V LED track lighting system offers a seamless, contemporary design solution for both residential and commercial spaces. Engineered for safety and ease of use, the system utilizes a unique click-in, pin-out mechanism that allows for rapid installation and flexible positioning. With robust load-bearing capabilities certified to UL1598 standards, this system provides a reliable and stylish lighting foundation.

## Technical Specifications

### Certification

UL1598

### System Voltage

DC48V

## Performance Metrics

### Load Capacity

**8 kg**

Single Connection Load

**30 kg**

Track Load (per meter)

## Installation & Design

### Installation Mechanism

Click-in, Pin-out

### Customization

DIY Covers, Adjustable Positioning, Contemporary Design
