

LPG Dispensing Nozzle

This nozzle is designed for dispensing liquefied petroleum gas. It features a lever-activated valve that allows for precise flow control during LPG transfer.

Product Overview

Professional LPG Dispensing Solution

This LPG dispensing nozzle is engineered for reliable and safe transfer of liquefied petroleum gas in professional fueling environments. Featuring a robust metallic body construction, it is built to withstand rigorous daily use. The integrated lever-activated valve system provides operators with precise flow control, ensuring efficient and secure dispensing operations.

Design & Construction

Body Material	Metallic
Operation Mechanism	Lever-activated valve
Ergonomics	Comfortable grip design

Performance

Primary Application	LPG Dispensing, Fuel Transfer
