

# LPG Forklift Engine

This robust LPG-powered forklift engine is designed for material handling in various industrial settings. It provides ample power and reduced emissions compared to gasoline alternatives.

## Overview

### High-Performance LPG Forklift

This LPG-powered forklift is engineered for demanding material handling applications, offering a balance of efficiency and reliability. Featuring a durable mast for heavy lifting and pneumatic tires for operation on uneven surfaces, it ensures consistent performance in diverse industrial environments. The unit prioritizes operator comfort with an ergonomic compartment and includes essential safety features like an overhead guard, lights, and mirrors.

## Technical Specifications

Power Source	LPG (Liquefied Petroleum Gas)
Tire Type	Pneumatic

## Features

Operator Comfort	Ergonomic Compartment • Enhanced Productivity
Safety Equipment	Overhead Guard, Safety Lights, Rearview Mirrors

## Performance

### Key Performance Metrics

**2500 kg**  
Lifting Capacity
