

LPG Powered Forklift Truck

This forklift is designed for material handling applications. It is powered by LPG and offers a clean, cost-effective operation.

Overview

Robust LPG Material Handling Solution

This LPG powered forklift is engineered for high efficiency and reliability in diverse material handling environments. Its compact design allows for excellent maneuverability in tight warehouse aisles or loading zones. Combining a high lifting capacity with an ergonomic operator cabin, this truck ensures both productivity and operator comfort during extended shifts.

Performance

Rated Capacity

3000 kg

Load Capacity

Technical Specifications

Power Source

LPG (Liquefied Petroleum Gas)

Features

Operational Benefits

- Clean operation
- Cost-effective fuel usage
- High maneuverability in tight spaces
- Durable construction

Key Features

Compact Design, Ergonomic Cabin, Advanced Safety Systems, High Lifting Capacity
