

LPG Powered Generator Set

This generator set is engineered to deliver a consistent power supply using LPG fuel. The unit features a sturdy frame, wheels for easy movement, and a simple control panel.

Product Overview

Reliable LPG Power Generation

This LPG-powered generator set provides a reliable and efficient power solution for diverse applications, ranging from home backup to construction sites and outdoor events. Designed with a robust frame and integrated wheels, it ensures excellent portability and durability in demanding environments. The unit utilizes an LPG engine, offering a cleaner and more efficient alternative to traditional gasoline models while prioritizing user safety with features like overload protection and low oil shutdown.
